

# FOR POWER & UTILITIES

The Decisions That Matter, Made Faster

Lead and thrive in the future of energy with advanced analytics and AI that modernizes how your work-force makes decisions. It's more than accelerating decisions — it's turning your operational and engineering history and expertise into a knowledge mine that informs every decision by every person, regardless of their level of experience.

Seeq empowers your engineers to maximize asset performance, improve grid reliability, and drive sustainability initiatives. Transform operational data into actionable intelligence that accelerates decision-making across generation, transmission, distribution, and renewable assets.

## Accelerate Energy Transition

Optimize Renewable Integration  
Reduce Emissions  
Meet Sustainability Targets

## Maximize Asset Life

Predictive Maintenance  
Condition-Based Monitoring  
Proactive Asset Management

## Grid Modernization

Real-Time Grid Monitoring  
Load Forecasting  
Regulatory Compliance

## Proven Customer Success

**\$1.5M**

### Reliability & Risk Mitigation

Avoided costs of repair  
& forced outages

**1-3%**

improvement in key metrics

**\$2-7M**

### Performance & Efficiency

Fuel & revenue benefit per year  
for a 1-2GW fleet.

**1-2%**

improvement in heat rate & efficiency metrics

**\$20M+**

### Forecasting & Markets

Incremental margin &  
avoided penalties

**3-6%**

improvement in forecast accuracy & market  
capture across multi-GW portfolios

## Solutions Across Power & Utilities

### Generation

Turbine Performance | Heat Rate & Efficiency Optimization | Emissions & Compliance Reporting | Rotating Equipment Monitoring & Diagnostics

### Transmission & Distribution

Transformer Asset Health | DER & Data Center Integration | Outage Risk Prediction  
Reliability Planning

### Renewables

Wind Turbine Reliability & Optimization | Solar Performance | Predictive Maintenance  
Battery Storage Performance | Curtailment Reporting | Revenue Protection

**OEM & Service  
Providers**

Automated Diagnostics | Secure Data Sharing Across Customers/Partners |  
Standardized Reporting | Event Triage & Investigation At Scale  
| Customer-Facing Dashboards

**Available Seeq Packages**

Empower SMEs to  
unlock insights that  
move the needle

Scale and operationalize  
insights unifies across  
the organization

Transform decision  
making and elevate  
performance with  
AI that unifies your  
ecosystem & expertise

Seeq Intelligence unleashes AI that discovers opportunities, shapes decisions, and transforms outcomes at enterprise scale. Seeq Intelligence takes the power of Seeq Enterprise to a new level, amplifying it with advanced industrial AI that delivers context-aware insights and high-impact results.

**What Makes Seeq Intelligence Different****Context Aware  
Agents**

Agent Q, your strategic analyst agent, interprets questions, identifies and synthesizes relevant information from across your ecosystem — including codified SME expertise — and rapidly returns actionable recommendations.

**Opportunity  
Identification**

Elevates the decisions with the greatest strategic and operational impact — including urgent or hidden ones — so leaders can act decisively on what matters most, when it matters most.

**Agentic  
Workflows**

Rapidly build and deploy intelligent agents that connect your ecosystem and orchestrate workflows that streamline expert processes, automate actions, and accelerate outcomes.

**Prevent &  
Protect**

Spot emerging asset risk early. Avoid forced losses, unplanned outages and the costs that follow

**Prioritize & Plan**

Focus maintenance scope and resources where risk and value are highest across your entire fleet

**Optimize & Act**

Make smarter dispatch and efficiency decisions in real time, across every asset in your generation portfolio

**Scale Expertise**

Empower every operator and engineer to act like your best, turning institutional knowledge into consistent decisions that scale.
