Cargill

Cargill Background

Founded in 1865 as a Grain business by the Cargill Family

Headquartered in Minnetonka, MN

A primary player in many different Food and Ingredient Spaces worldwide

The GEOS business supports many customers in various industries with all types of Food oils

Objectives for the Presentation

The Power of Capsule
Properties

Creating Visuals that Fit your
Audience

Best Run Rate Summary

CHALLENGE

Calculating Best Run Rates for multi-product vegetable oil refineries

SOLUTION

Utilize Seeq to create repeated hourly capsules covering 28 days

RESULTS

New business capability and enhanced process targets

Best Run Rate Calculation

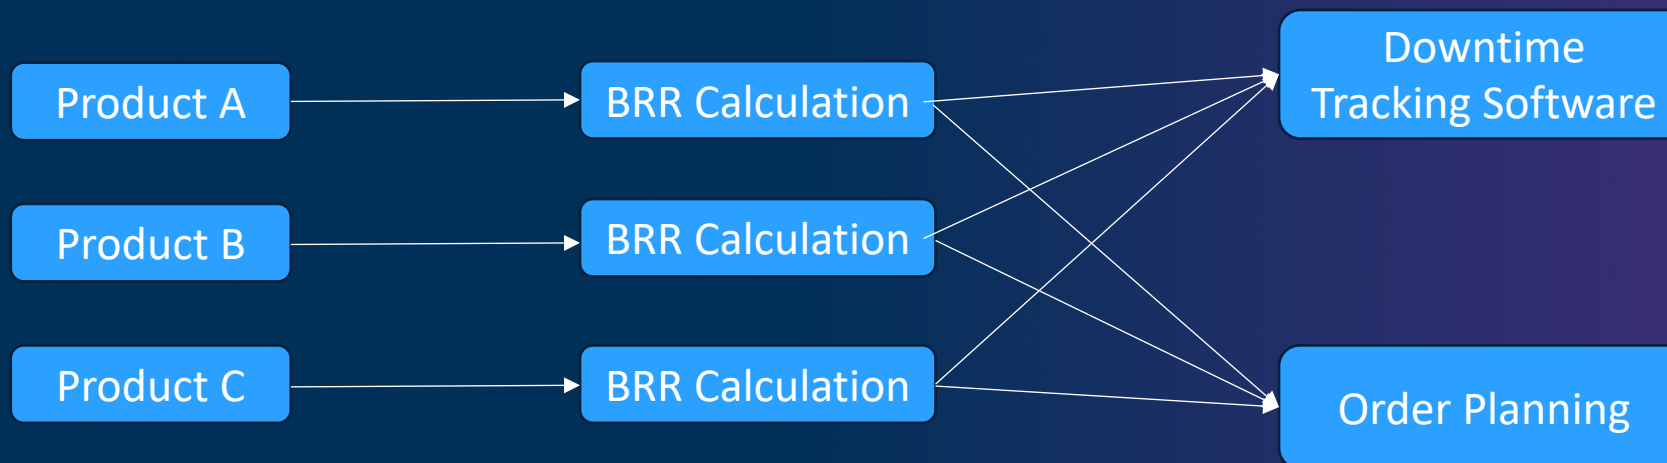

- Best Run Rate is defined as the best 28 days for running for a product
- Process works best by using hours and excluding hours involving changeovers
- Can span through other product runs

35 Days

Background Information

- The GEOS refineries run different oil types through multiple deodorizers
- Products are assigned what is called a Best Run Rate
- Previously attempted with spreadsheet and links to abbreviated time series data

Steps in Seeq

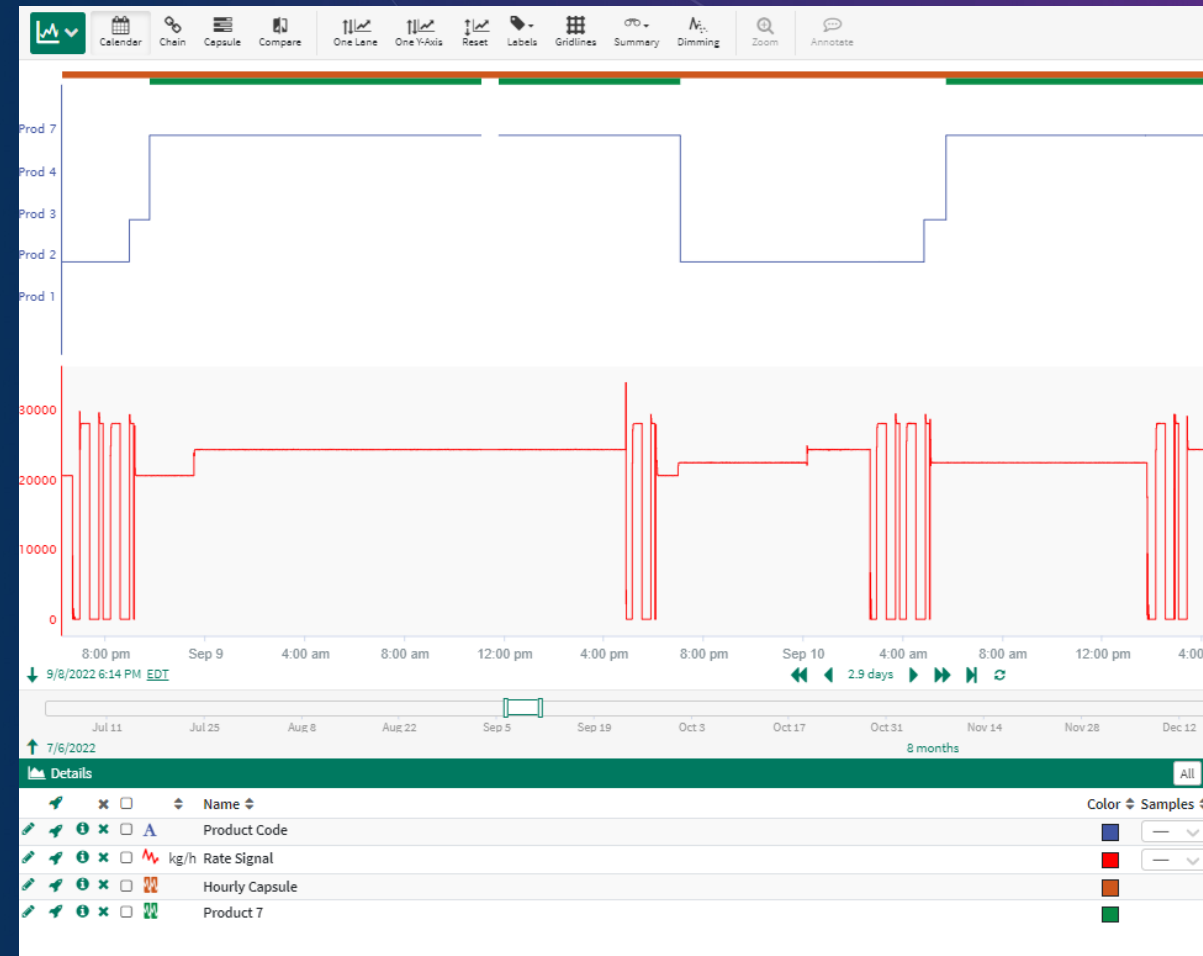

- Collect Signals
- Establish Capsules
- Calculated Hourly Averages
- Continuous Capsules
- Simplifying Capsules
- Export to OData

Seeq Setup

Capsule Setup

- Start with Hourly Capsules
- Establish the time period for analysis
- Select your first product
- Check if there is 28 Days in the analysis period

Hours and Averages for Product

Continuous Capsules

fx Monthly Capsules

Variables

Name	Item
\$P7-10k	Product 7 -10k Rate Averages (kg/h)
\$P7Hours	Product 7 Hours - <10k

Formula

```
1 $P7Hours.toCapsulesByCount(672,200d).setProperty('Rate',$P7-10k,average())
```

	Rate
Mar 3, 2022 2:00 AM - Apr 27, 2022 9:00 PM	20266
Mar 3, 2022 1:00 AM - Apr 27, 2022 8:00 PM	20242
Mar 2, 2022 4:00 PM - Apr 27, 2022 7:00 PM	20233
Mar 2, 2022 3:00 PM - Apr 27, 2022 6:00 PM	20223
Mar 2, 2022 2:00 PM - Apr 27, 2022 5:00 PM	20214
Mar 2, 2022 1:00 PM - Apr 27, 2022 3:00 PM	20205
Mar 2, 2022 12:00 PM - Apr 27, 2022 2:00 PM	20195
Mar 2, 2022 11:00 AM - Apr 27, 2022 1:00 PM	20186
Mar 2, 2022 10:00 AM - Apr 27, 2022 12:00 PM	20178
Mar 2, 2022 9:00 AM - Apr 27, 2022 11:00 AM	20169
Mar 2, 2022 8:00 AM - Apr 27, 2022 10:00 AM	20161
Mar 2, 2022 5:00 AM - Apr 26, 2022 8:00 AM	20156
Mar 2, 2022 7:00 AM - Apr 26, 2022 10:00 AM	20154
Mar 2, 2022 4:00 AM - Apr 26, 2022 7:00 AM	20153
Mar 2, 2022 6:00 AM - Apr 26, 2022 9:00 AM	20151
Mar 2, 2022 3:00 AM - Apr 26, 2022 6:00 AM	20142
Mar 2, 2022 2:00 AM - Apr 26, 2022 5:00 AM	20131

Simplifying Capsules

Two ways to do this

- Formula
- Odata Export

fx Single Value Rolling Month

✓ Variables

Name	Item
\$mc	Monthly Capsules Product 7

+ Add Variable Details

✓ Formula

```
1 $rate = $mc.toSignal('Rate',startkey())
2 $interval = quarters(month.June,1)
3 $max_per_quarter = $rate.aggregate(maxValue(), $interval, durationkey())
4 $mc.keep($capsule -> $capsule.property('Rate') == $max_per_quarter.valueAt($capsule.startkey()))
```

Export to OData

✓ Name
