

Seeq IEM Experience

OVERVIEW

Seeq's Industrial Enterprise Monitoring™ (IEM) Experience is a focused, 30-day guided pilot designed to help you realize the value of IEM faster. Built for teams ready to move from insights to impact, this engagement targets a high-priority use case to demonstrate measurable business outcomes—within a month.

OBJECTIVE

The Seeq IEM Experience accelerates your time-to-value by applying the IEM Suite to a specific, high-impact operational challenge. With a clearly defined scope, success criteria, and hands-on support, your team will see how IEM drives tangible improvements—quickly.

WHAT TO EXPECT

Use Case Alignment: Collaborate with Seeq to define a critical use case where IEM can deliver fast, meaningful impact. Success criteria will be established up front.

Statement of Work (SOW): A formal SOW outlines scope, objectives, and success metrics. This ensures mutual alignment and enables trial license activation.

Activation & Access: Your team receives a temporary license for the IEM Suite—including Seeq Vantage and Condition Monitors via Webhook. Advanced functionality may be enabled for the Analytics Engineer, based on your use case. alignment and enables trial license activation.

Value Delivery: Seeq's Customer Success team partners with your team to execute the project and demonstrate the business value of IEM—supporting operational, reliability, or compliance goals.

IS THE EXPERIENCE RIGHT FOR YOU?

- Existing Seeq Customer already using Condition Monitors
- High-impact use case identified and aligned with business priorities
- Enterprise or strategic account ready to explore broader IEM deployment
- Cross-functional team able to engage during the 30-day period

READY TO GET STARTED?
